PROFESSIONAL SUMMARY

MCA student and aspiring Software Developer with hands-on MERN stack development experience through an internship and full-stack projects. Familiar with building React.js interfaces, developing REST APIs using Node.js and Express.js, and managing application data with MongoDB. Developed web applications for clinical management, tourism, vehicle sales, and tutor discovery. Seeking an entry-level software development opportunity to apply technical skills and contribute to real-world projects.

EDUCATION

Master of Computer Applications (MCA) | Mar Athanasius College for Advanced Studies, Thiruvalla | MG University • 2025–2027 (Pursuing)

Bachelor of Computer Applications (BCA) | Mar Gregorios College for Arts and Science, Punnapra | Kerala University • 2022–2025

TECHNICAL SKILLS

Programming Languages: JavaScript, Python, Java, PHP

Frontend: HTML5, CSS3, JavaScript, React.js

Backend: Node.js, Express.js, PHP

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, Postman, Visual Studio Code

PROJECTS

Clinical Management System | *MongoDB, Express.js, React.js, Node.js*

- Built a full-stack application for managing patient and clinic records with create, read, update, and delete (CRUD) operations.
- Developed REST APIs using Node.js and Express.js and connected them to a React.js interface and MongoDB database.
- Enabled staff to add, search, update, and delete records through a centralized digital system.

Traditional Tourism Development Department | *Web Application*

- Developed a web platform to promote tribal culture, heritage, and sustainable tourism.
- Organized information about tribal villages, cultural events, traditional art forms, handicrafts, local attractions, and accommodation.
- Implemented administrator content management to add and update tourism information.

Car Sale Management System | *Web Application*

- Developed a vehicle sales platform supporting vehicle inventory, customer records, bookings, and sales management.
- Enabled customers to browse vehicles, view specifications, compare models, and submit purchase inquiries.
- Centralized vehicle and customer information to reduce manual record keeping.

Private Tutor Finder System | *HTML, CSS, Bootstrap, JavaScript, PHP, MySQL*

- Built a platform where parents can search tutors by subject, location, teaching mode, and fees, while tutors manage their profiles.
- Implemented role-based access for administrators, tutors, and parents, including tutor approval and subject management.
- Added demo-class requests, booking workflows, ratings, feedback, and notifications.

INTERNSHIP EXPERIENCE

Front End and Back End Development Intern | *Faith Infotech, Trivandrum* | *2026*

- Built the React.js front end and Node.js/Express.js back end for a Clinical Management System using MongoDB.
- Connected application interfaces and APIs to support clinical record management and CRUD operations.

CERTIFICATIONS

- Full Stack Web Development – MERN Stack (A Grade), Capital Infotech, Thiruvalla — 50 hours | Jun 2026
- Python for Data Science, NPTEL (IIT Madras) — 60% score | Jul–Aug 2026
- Introduction to Artificial Intelligence (AI), IBM (Coursera) | Apr 2025

LANGUAGES

English, Malayalam, Tamil
